# Universal Silicone Teat

... Change a normal bottle into a feeding bottle in seconds...

With the universal silicone teat, you can transform a normal 33cl or 50cl drinks bottle into a feeding bottle in seconds.

Simple to use, the teat comes in a variety of colours and be customised with your own logo.

The universal silicone teat comes enclosed in a sterile case. It can be screwed onto the chosen bottle without any contact being made with the teat itself, providing a safe, sterile teat for your child to drink through.

The contained teat can be kept in a bag for protection when the drink has been finished, meaning the teat can be taken home, cleaned and reused.
